DELTA YACHT 88 IPS WINS CUSTOM YACHT OF THE YEAR AT THE 2015 MOTOR BOAT AWARDS

FOR IMMEDIATE RELEASE Miami Beach, Florida – The 88ft, all-carbon DELTA Yacht has been named Motor Boat of the Year for 2015. The award was presented at a gala ceremony held at the Landmark Hotel in London on the evening of 12 January.

Securing the Custom Yacht category for these prestigious awards, which are sponsored by Pantaenius and presented annually by Motor Boat & Yachting Magazine during the London Boat Show, the DELTA Yacht is one of only nine award recipients selected from a pool of five finalists in each category. The finalists are judged by a jury of journalists from Motor Boat & Yachting and Motor Boats Monthly magazines on their merits in terms of seaworthiness, performance and deck space as well as glamour, design and innovation. It is not the first time the Swedish builder has been honored with such an award; the all carbon fiber DELTA 54 IPS was presented the same title in the Sports Cruiser over 45ft category in 2013.

Introduced in 2013, the all carbon fiber DELTA Yacht 88 IPS represents the builder's entrance into the megayacht arena. Designed by Lars Modin, the DELTA Yacht has been purpose-built for luxury, comfortable cruising and fuel efficiency. Three Volvo IPS 1200s power this 80ft hull to a spritely 39-knot top speed. The Volvo IPS system features joystick control that allows for superb

maneuverability and effortless owner/operator handling. Sea trials have shown fuel consumption that is up to 40% less than that of comparable sized yachts.

Completed to an owner's specifications, the DELTA Yacht features a world-class Scandinavian designed interior that is highlighted by exceptional visibility, high-end finishes and generous storage. Designed for owner/operators or to run with a small professional crew, the DELTA Yacht features a full-beam king size master suite, a VIP and two twin cabins along with accommodations for two crewmembers. Large, versatile cockpit and exterior deck areas easily facilitate any on-the-water activity, from fishing and diving to swimming and sunning.

"We are extremely proud to be recognized for our game-changing techniques in yacht construction with such a prestigious award," says Chapman Ducote, DELTA Carbon Yachts' Director of the Americas. "To date, all of our 88 carbon yachts have been delivered to European clients. We are looking forward to delivering the next 88 to an American client, so that the American market can experience a yacht that is like no other."

About DELTA Powerboats: From its ISO-certified production facility in Saaremaa, Sweden, DELTA Powerboats has been designing and building innovative sport, sailing and cruising boats since 2003. Current production models range from 26 to 88 feet with over 400 vessels delivered to date.

About DELTA Carbon Yachts: As the exclusive importer/distributor for Swedish-built DELTA Powerboats in the Americas, DELTA Carbon Yachts prides itself not only on offering a product that is unmatched in style, technology and quality by any other manufacturer in the American market, but on extending the same level of service and care "post sale" for which DELTA Powerboats is known. DELTA Carbon Yachts offers DELTA models from 26 to 88 feet, with an emphasis on the all carbon fiber sport yacht builds at 54 and 88 feet.
