DELTA CARBON YACHTS UNVEILS NEW 55 OPEN AND 54 TUNA CONCEPTS AT THE PALM BEACH INTERNATIONAL BOAT SHOW

FOR IMMEDIATE RELEASE West Palm Beach, Florida – Delta Carbon Yachts has unveiled two new models in its series of carbon fiber production yachts at the Palm Beach International Boat Show. The 55 Open (pictured) and 54 Tuna concepts are variations on existing Delta Powerboats series that implement all carbon fiber construction and requested owner/operator features.

A delightful blend between Delta Powerboats' popular Open dayboat series and the award-winning 54 Carbon Cruiser yacht, the 55 Open concept is designed as an efficient, stylish and seaworthy day cruiser. The 55-footer is powered by triple Volvo IPS drives which, when combined with her superior hull design and vacuum infused carbon fiber/divinycell/vinylester construction, allow her to achieve an impressive 40-knot maximum speed while maximizing fuel consumption. Three ensuite cabins, a large open deck and fully equipped galley area round out the 55's Scandinavian designed and impeccably finished interior. Seakeeper's zero speed gyroscopic stabilization is among the many upgrade options available on this semi-custom boat.

Designed for the avid sportfisherman who appreciates performance and style yet does not want to compromise on luxury and comfort, the 54 Tuna is a new concept based on the award-winning 54 Carbon Cruiser. Specified to her owner's preferences, the 54 Tuna is spec'd similar to the 54 Carbon, powered by triple Volvo IPS drives and featuring three ensuite cabins, a large salon graced with plentiful windows and fully equipped galley area. The multipurpose aft deck features a convertible table and seating, and is fully equipped to accommodate a day of fishing and an evening of al fresco dining. A flybridge version is also available.

"Following on our recent sale of a 33 Open and tremendous interest in the performance and style of the 54 Carbon, we are pleased to present these new concepts that further illustrate the scope and potential of Delta Carbon yachts," says Chapman Ducote, Delta Carbon Yachts' Director of the Americas. "The 54 Tuna will provide avid sportfisherman with the best on-water fishing experience, as it offers the very best in sportfisher amenities on a platform never before seen in this arena – 100% carbon fiber, excellent fuel economy and superior interior accommodations. The 55 Open is simply the most elegant dayboat on the water, with a flexible layout that accommodates everything from entertaining to sunbathing."

The Delta 26 Open, 33 Open and 54 Carbon are available for sea trials in Miami Beach. The 54 Carbon and 33 Open are currently on display at the Palm Beach International Boat Show through March 29, 2015. Trials are by appointment only and may be arranged by calling 305-439-5803 or emailing sales@deltapowerboats.us. Brokers welcome.

About DELTA Powerboats: From its ISO-certified production facility in Saaremaa, Sweden, DELTA Powerboats has been designing and building innovative sport, sailing and cruising boats since 2003. Current production models range from 26 to 88 feet with over 400 vessels delivered to date.

About DELTA Carbon Yachts: As the exclusive importer/distributor for Swedish-built DELTA Powerboats in the Americas, DELTA Carbon Yachts prides itself not only on offering a product that is unmatched in style, technology and quality by any other manufacturer in the American market, but on extending the same level of service and care "post sale" for which DELTA Powerboats is known. DELTA Carbon Yachts offers DELTA models from 26 to 88 feet, with an emphasis on the all carbon fiber sport yacht builds at 54 and 88 feet.
