## **DELTA CARBON YACHTS WELCOMES FIRST 26 OPEN *BLACK EDITION***

**FOR IMMEDIATE RELEASE** Miami Beach, Florida – Delta Carbon Yachts has welcomed a new model to its Miami-based offerings. Custom designed by Chapman Ducote specifically for the Miami market, the 26 Open *Black Edition* is the first of its kind to be offered in U.S. waters.

Intended as a standalone weekender or sleek and seaworthy megayacht tender, the 26-footer features a unique multifunctional design intended to maximize entertaining, swimming and sunbathing. The 26 Open *Black Edition* features open walkaround decks and an elevated foredeck area that allows for a comfortable cabin and head below deck. A full galley area is ingeniously situated beneath the convertible driver's seat and a settee and teak table on the aft deck can be transformed into either a spacious lounging area or picnic table at will. The custom *Black Edition* sports an all-black exterior distinguished by burnt orange Sunbrella upholstery and features a stern anchor for easy sand bar use as well as a hidden bimini top for a quick retreat from the elements.

Powered by a Volvo Penta engine in options of 220, 320, and 380-hp, the 26 Open *Black Edition* enjoys top speeds up to the 50+ knots. Built at Delta Powerboats' state-of-the-art facility outside of Stockholm, Sweden, the 26 Open features a twin-stepped deep-v composite hull constructed using the Diab Core Infusion Technology process. Vacuum infusion combined with carbon fiber reinforcements yields high strength, light weight and extreme durability.

"The 26 Open *Black Edition* is designed to turn heads, whether out for a day cruise or transporting elite guests from a mother vessel to the hottest restaurant

in town,” says Chapman Ducote, Delta Carbon Yachts’ Director of the Americas. “Delta Powerboats are known for their superior construction – both in all carbon fiber or reinforced vacuum infused composite – and their seaworthiness. The *Black Edition* combines beauty, power and a flexible layout to create a truly unique package that has never before been seen in U.S. waters.”

The Delta 26 Open *Black Edition* is now available for sea trials in Miami Beach. Trials are by appointment only and may be arranged by calling 305-439-5803 or emailing [sales@deltapowerboats.us](mailto:sales@deltapowerboats.us). Brokers welcome.

**About DELTA Powerboats:** From its ISO-certified production facility in Saaremaa, Sweden, DELTA Powerboats has been designing and building innovative sport, sailing and cruising boats since 2003. It is one of the few builders in the world capable of building all carbon fiber yachts over 50 feet. Current production models range from 26 to 88 feet with over 400 vessels delivered to date.

**About Delta Carbon Yachts:** As the exclusive importer/distributor for Swedish-built Delta Powerboats in the Americas, Delta Carbon Yachts prides itself not only on offering a product that is unmatched in style, technology and quality by any other manufacturer in the American market, but on extending the same level of service and care “post sale” for which Delta Powerboats is known. Delta Carbon Yachts offers all Delta models from 26 to 88 feet, with an emphasis on the all carbon fiber sport yacht builds at 54 and 88 feet as well as unique, high quality day boats and supertenders.
